LUXEMBOURG'S INDUSTRY ON PFAS

Luxembourg's industrial sector fully recognizes the regulatory and scientific matters under assessment related to certain per- and polyfluoroalkyl substances (PFAS).

Ongoing efforts to substitute PFAS where feasible, invest in alternatives, and reduce environmental footprints demonstrate the industry's willingness to be part of the solution. In this spirit, Luxembourg's industry remains a constructive and reliable partner in achieving high standards of health and environmental protection while sustaining safe and resilient industrial activity in Europe.
