TANGO AND TELINDUS PARTNER WITH NOKIA AND ERICSSON ON THE DEPLOYMENT OF THEIR INNOVATIVE MOBILE NETWORKS

Bertrange, December 15th, 2020 – Tango and Telindus are proud to announce their partnerships with Finland's Nokia and Sweden's Ericsson to bring the best of tomorrow's mobile networks to Luxembourg.

Tango and Telindus have their sights on an increasingly digital Luxembourg and are reinforcing their position here as leaders in new technologies and innovation. This partnership with Nokia and Ericsson is already helping to pave the way for a first-rate, sustainable and forward-looking mobile network. Drawing on proven global expertise, this alliance will enable the market to benefit from a brand new mobile network and take advantage of the 5G of the future.

For the mobile RAN (Radio Access Network), Nokia has been chosen to actively participate in the deployment of the 5G network and to gradually upgrade the existing 2G/3G/4G networks by 2023.

For the Core Network, Ericsson was chosen for its dual-mode 5G core. This state-of-the-art solution is natively equipped with a cloud infrastructure and supports 5G NR Standalone (SA) and Non-Standalone (NSA), 4G, 3G and 2G technologies.

"Our customers will be able to enjoy a whole new experience thanks to our mobile network. By combining Nokia's RAN expertise and Ericsson's Core Network solution, we are joining forces with two of Europe's leading technology and innovation champions. This collaboration plays a crucial role as we implement our network strategy. We are delighted to work with these European players. The pick of the bunch for this new stage of digital transformation of Luxembourg's economy and society as a whole." said **Gérard Hoffmann, CEO, Proximus Luxembourg**

Tommi Uitto, President of Mobile Networks, Nokia, added: "*We are delighted and proud to extend our long-standing partnership with Proximus in Luxembourg which demonstrates their continued confidence in Nokia and our technology. Nokia was also recently selected by Proximus Belgium for 5G and this deal continues Nokia's strategic partnership with the Proximus Group. We look forward to supporting them on their 5G journey.*"

"Ericsson has currently more than 70 live 5Gnetworks all over the world and decades of experience. With Tango we value a fruitful long-term partnership and they are trusting us to deliver reliable, sustainable and secure connectivity in this crucial part of their network. Our cloud native solutions mean an efficient transition to a future-proof network, and with our leading 5G portfolio, we are ready to support Tango and Telindus to deliver 5G in Luxembourg." concludes **Rémi de Montgolfier, General Manager Ericsson BeLux.**
