INFORMATION TECHNOLOGY FOR TRANSLATIONAL MEDICINE (ITTM) S.A.

DESCRIPTION

ITTM is a successful and innovative company offering interwoven products and services which help to integrate various health data, including patient-generated data (PROMs, PREMs, wearables), and facilitate seamless data sharing to enable more efficient matching of data with clinical research opportunities and appropriate clinical trials. ITTM enables the standardization and harmonization of health data into common models (e.g. OMOP-CDM). ITTM was one of the first SMEs which was certified as EHDEN Certified SME and the transformation of fragmented and inconsistent data into a coherent, actionable format and ITTM is actively in all aspects of data management and sharing and supports projects and customers with process understanding and interoperability expertise (enabling AI).
