DATA DESIGN ENGINEERING S.À R.L.

DESCRIPTION

Data Design Engineering is a forward-thinking enabler of high tech AI adoption and exploitation, leveraging extensive experience across diverse industries. Specialising in on edge device offline AI capabilities, space and earth observation, natural language processing, prediction analysis, image processing, voice cloning, and more, we bring cutting-edge solutions to the forefront. Our AI on Edge-device Offline Technology refers to embedding AI-based operational models within robots or other unmanned equipment, enabling them to operate independently even under offline conditions.
