EMTRONIX S.À R.L. – ANYWAVES LUXEMBOURG

DESCRIPTION

EmTroniX develops and offers embedded electronic products and specialized payloads in radio frequency technologies for space systems. Thanks to its membership in the Anywaves industrial group, EmTroniX can also sell antenna products manufactured in France by Anywaves from Luxembourg. EmTroniX is the ideal partner to provide a turnkey solution from Luxembourg based on an optimized end-to-end radio frequency chain. Our solutions are based on off-the-shelf products, but also adapted to our customers' needs, offered by the Anywaves group. These include antennas, RF input stages, a multi-channel software-defined radio offering extensive signal and information processing capabilities, and numerous interfaces for all types of satellites. EmTroniX is a proud Luxembourg-based industrial player, manufacturing printed circuit board assemblies and integrating finished products at its Hautcharage site. EmTroniX is preparing its future 1200m² production site, still in Hautcharage, which will allow for the deployment and storage of a portfolio of off-the-shelf products as well as testing equipment for complete solutions or payloads. The solutions offered by EmTroniX enable our customers to deploy applications such as: - remote control, telemetry and control - positioning, navigation and onboard time management - payload data transfer - radar - radio frequency spectrum monitoring - inter-vehicle space link
