PANIAM.CLOUD S.À R.L.

DESCRIPTION

PanIAM designs and markets a cloud infrastructure protection platform that enables businesses to secure their environments quickly, reliably, and without false positives. Our technology immediately identifies truly critical vulnerabilities, accelerating remediation and significantly improving the efficiency of cybersecurity teams. We work both directly with our clients and through IT service companies, consulting firms, and integrators. In parallel, PanIAM supports organizations in their compliance and certification processes, particularly within the framework of DORA, NIS2, and the Cyber Resilience Act regulations, by providing them with a comprehensive and structured understanding of their security posture.
