SEEZAM S.A.

DESCRIPTION

SeeZam.com is an online "virtual safe deposit box" service based in Luxembourg. It allows for ultra-secure storage of sensitive files and data thanks to a key feature called "information secrecy". With information secrecy, files are end-to-end encrypted in such a way that even SeeZam itself does not have access to their decrypted content. Only the user holds the decryption keys. This absolute confidentiality is made possible by Luxembourg's highly protective legislation regarding private data. SeeZam can thus legally offer a storage service where neither they nor any third party can access users' encrypted data. It is therefore a unique solution for securely storing truly sensitive information online, acting as a truly inviolable "virtual safe deposit box".
