EDEIS LUXEMBOURG S.À R.L.

DESCRIPTION

Edeis Luxembourg, an engineering firm specializing in industrial buildings and processes, supports industrial clients in their construction, renovation, or expansion projects, from feasibility studies to operational commissioning. Our role is to provide comprehensive project management: design, coordination, and site supervision. We have acquired extensive local experience, exemplified by large-scale projects such as the Jean Monnet 2 Building (office complex for the European Commission) in Kirchberg. Edeis Luxembourg also leverages the resources of the EDEIS Group, which has been present in France for over 100 years and is a partner of major industrial clients such as Dassault and Manitou. Specifically, our industry experts design customized technical solutions, whether for: • the construction of a new production facility, • the modernization of an existing building or process, • the expansion of a factory requiring complex expertise.
