CLARENCE S.A.

DESCRIPTION

Clarence is the result of a partnership between Proximus Luxembourg and LuxConnect. A joint venture born out of the desire to create a disconnected sovereign cloud in Luxembourg, designed to meet the advanced technology needs of businesses while retaining control over the integrity of their data and access to it, and also to ensure that their operations are carried out on Luxembourg territory and subject only to European jurisdictions. At Clarence, our values are rooted in transparency and trust. We are committed to protecting your data and complying with strict confidentiality regulations. Our main missions are to offer you a sovereign, disconnected cloud solution at the cutting edge of innovation - based on Google Cloud technology - while guaranteeing the confidentiality and security of your most sensitive information, giving you control over your data, and offering you complete autonomy over your operations.
