

# ÄERD LAB S.À R.L.

## DESCRIPTION

Äerd Lab transforms local clay waste into 3D-printed, low-carbon building materials that are modular, beautiful, and circular by design. Our proprietary mix eliminates the need for firing, reducing CO<sub>2</sub> emissions and is cutting energy consumption in production. Using geopolymers and robotic manufacturing, we minimize waste, energy use, and labor time. We help the construction industry build faster, cleaner, and smarter – without compromising on aesthetics.

## CERTIFICATION

## CONTACT
