2023 ANNUAL REPORT

While, on a global scale, 2023 was once again marked by geopolitical instabilities affecting international trade, in Luxembourg, the year under review was marked by a double electoral rendez-vous and the arrival of a new government, all against a backdrop of persistent inflation and economic slowdown.
Whether on energy or environmental issues, innovation or digitalization, or labor relations and talent, the FEDIL team was constantly on hand to listen to companies' concerns and provide advice and assistance.
