HELLOFUTURE: SHARE YOUR EXPERIENCE AND INSPIRE YOUNG PEOPLE!

Summary / Content

FEDIL IS CALLING ON ITS MEMBERS TO PUT TOGETHER A POOL OF SPEAKERS!

Together with our partners, the Luxembourg government and the Chamber of Commerce, FEDIL will be relaunching the HelloFuture initiative at the start of the 2024 academic year, designed to introduce young people to industry and its professions.

For those of you familiar with the HelloFuture *Roadshows* that toured secondary schools back in 2017, you should know that we have adapted the format to advocate a more targeted approach.

From now on, we will be offering secondary schools an initiative to raise awareness of the technical and scientific professions, which are sorely needed in industry, through presentations given as a priority to classes of 4^e and 3^e in *lycées classiques* and *techniques*. These 45-minute presentations will include a general part on the importance of industry in the Luxembourg economy and a part focusing on real-life experiences, reported by representatives of industrial companies. The latter will be available to answer the students' questions on the issues addressed by industry, the specificities of its professions and training, and career opportunities.

FEDIL IS CALLING ON ITS MEMBERS TO PUT TOGETHER A POOL OF SPEAKERS!

If your company or, of course, you yourself are interested in taking part in the HelloFuture project and sharing your experience of the field with a young audience, don't hesitate to contact us.

Together with the person appointed to represent your company, we will define the content of these presentations to secondary school classes to ensure a consistent presentation, punctuated by “stories” that arouse the interest and curiosity of young people. In addition, the speakers can benefit from tailor-made public speaking training, targeted at a young audience of schoolchildren.

FEDIL is counting on your support to make HelloFuture a success and mobilise young people in favour of industry and its professions. What's more, this initiative will also enable you to position yourself as an employer of future talent.

No lesson is more inspiring than a first-hand account from the professional world!

The FEDIL team will be happy to provide you with more information about the HelloFuture project.
