Do you want to work in a fast paced, world class organization with a long history and an exciting future? Do you want to be part of a team based in Colmar-Berg contributing to the innovation, safety and sustainability of tires that drivers across EMEA rely on every day?

... if the answer is yes, then we have the right job for you :

Quality Coordinator for our Goodyear Mercury Plant - Dudelange (m/f)

The opportunity:

You will have the opportunity to join a multinational team for a new factory using innovative technology and state of the art equipment. Within that team you will be responsible for executing and coordinating quality activities, in particular:

- Training, guidance, coordination & control all members of the Quality staff in the shift
- Operational quality management within the current shift, monitoring and evaluation of quality results (waste, recovery, TU), root cause analysis, initiation and monitoring of remedial actions
- Coordinate decisions to be made with team leader and support team, sharing information with management
- Collaboration to ensure a fast, stable and predictable process flow when a tire size is started or restarted in production. Collaboration in case of test tires build and the introduction of new products in the production, protection or monitoring of associated algorithms
- Analyze the technological process and derive measures to improve the effectiveness, quality and productivity of the entire manufacturing process

To join our team you will need:

Education:

Technical high school diploma or Bachelor degree in mechanical/electrical engineering, industrial engineering, chemistry or equivalent apprenticeship

Languages:

The candidate needs to have a good level of English. German and/or French will be considered as an asset

Experience:

- Minimum 4 years of working experience in quality assurance in the tire industry
- Team coordination experience desired

Skills & Qualifications:

- Ability to operate both manual and automated industrial machinery
- Ability to perform root cause analysis and propose corrective actions in response to quality issues.
- Good data analysis skills and familiarity with quality metrics and charts
- Ability to follow documented procedures.
- Strong teamwork and collaboration skills - combined with the capability to lead and coach co-workers
- Sense of urgency to resolve issues, self-initiative
- **Position requires shift, evening, night and weekend work assignments**
